

Be the one to save a life.

Help Jennifer

Jennifer Jones Austin is 41, a wife and mother of two children, ages 12 and 8. She is suffering from Leukemia, and is in an immediate need of a bone marrow transplant. Without a bone marrow transplant, doctors have indicated that her chances of survival are slim.

A bone marrow transplant requires a 100% compatible match. Because none of her siblings were a match, her best chance of finding one is through the Be The Match Marrow Registry. That is why we are asking for YOUR help. Be The Match Registry is in need of registered donors.

A simple cheek swab is all that is needed to determine if YOU could be the one to save Jennifer or one of the other thousands of patients in need of a bone marrow transplant.

If you are a match, 9 times out of 10, your donation will only require giving blood. A surgical procedure is NO LONGER the only method to donate.

To help Jennifer, and many other patients like her, take the first step: Join the Be the Match Marrow Registry as a potential bone marrow donor by coming to drive below or joining online to receive a cheek swab kit to see if you are a match.

You can join online at www.savejenaustin.com or <http://join.marrow.org/JJA1068>
